

IBM BOB 2.0 HACKATHON

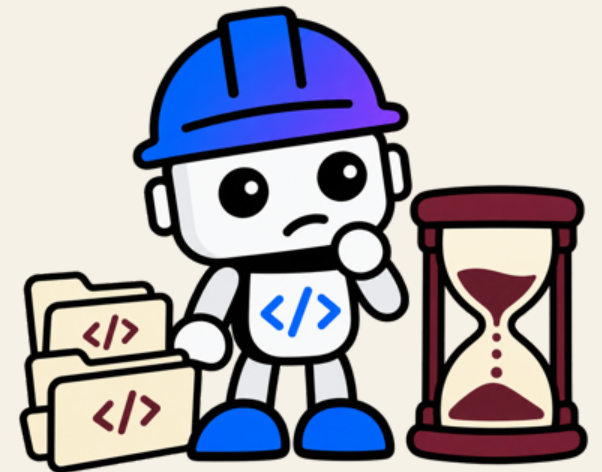

Can IBM Bob review old SAP code?

We tested it against problems we planted in advance.
Then we broke its code on purpose.

31.12.2027

SAP ends mainstream maintenance for ECC 6.0. Picture the one ABAP developer at a mid-size manufacturer with **600 custom programs** to review by hand.

A Bob custom mode that reviews old SAP code for the cloud.

Bob reads

12-rule Clean Core catalogue. Read + Edit only.

Bob reports

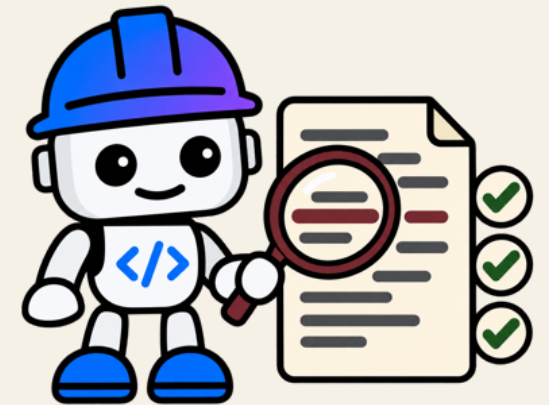

Line, rule, reason. No invented rules.

Bob rewrites

View, class, unit tests.

Tests decide

On a real SAP system.

TRY IT NOW

Every finding, on the exact line.

Pick a program, see what Bob found
and whether Bob was right. No
login.

LEGACY CODE. CLEAR DECISIONS.

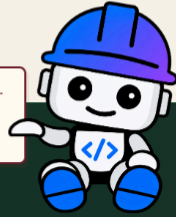

See exactly what Bob found.

Bob flagged 8 places in this program. Click a highlighted line to see the code, Bob's reason, and whether Bob was right.

Saved results from Bob's hackathon runs. Not a live tool, and not tested on a customer's SAP system. Bob's rewritten class did pass 8 of 8 unit tests on an SAP BTP trial system.

Code excerpt · code lines 30–36 · full source below

```
30 SELECT b~lifnr, l~name1, b~belnr, b~zfbdt, b~dmbtr
31 FROM bseg AS b
32 INNER JOIN lfa1 AS l ON l~lifnr = b~lifnr
```

SELECT b~lifnr, l~name1, b~belnr, b~zf...
Reads the finance data tables directly;
the cloud version may not allow that.

SAVED RESULTS These are Bob's answers from the hackathon runs, shown unchanged. Our judgements are kept separately.

Findings to explore

Unpaid supplier invoices

Code name: ZFT_VENDOR_AGING

Lists unpaid supplier invoices by how overdue they are

8 problems flagged by Bob

Open customer orders

Code name: ZSD_OPEN_ORDERS

Prints open sales orders for each customer

18 problems flagged by Bob

Bulk material price updates

Code name: ZMM_MASS_PRICE_UPDATE

Raises the price of every material in a plant

8 problems flagged by Bob

Material list

Code name: ZCC_LEGACY_MATERIALS

Shows a list of materials

6 problems flagged by Bob

Unpaid supplier invoices

Across all four programs Bob caught 27 of 29 rule problems and 1 of 12 logic bugs.

All findings

✓ Bob was right

Answers written down before Bob saw any code.

4

old SAP programs

41

planted problems

24 Sep

answer key sealed by hash

04 • WHAT BOB FOUND

27/29

rule problems

1/12

logic bugs

29/32

findings right

✓ 0 of 40 invented a rule

✓ 0 of 40 claimed a system check

Strong on the rules. Weak on business logic, so a person still checks that.

Do the tests really guard Bob's code?

SAP BTP trial · stand-in tables · Bob's 7 tests + 1 team-added test (431 cases)

We set the limit to 31. Two tests failed.

Bob's class, one line changed

```
CONSTANTS c_threshold_30  
  TYPE i VALUE 31.
```

was 30
