

IBM BOB 2.0 HACKATHON

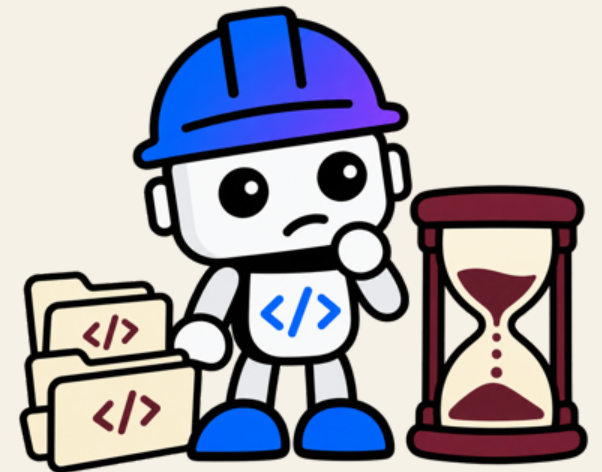

Can IBM Bob review old SAP code?

We tested it against problems we planted in advance.
Then we broke its code on purpose.

31.12.2027

SAP ends mainstream maintenance for ECC 6.0. Picture the one ABAP developer at a mid-size manufacturer with **600 custom programs** to review by hand.

A Bob custom mode that reviews old SAP code for the cloud.

Bob reads

12-rule Clean Core catalogue. Read + Edit only.

Bob reports

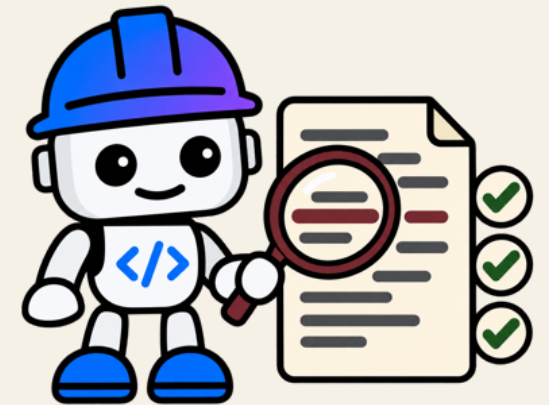

Line, rule, reason. No invented rules.

Bob rewrites

View, class, unit tests.

Tests decide

On a real SAP system.

Answers written down before Bob saw any code.

4

old SAP programs

41

planted problems

24 Sep

answer key sealed by hash

04 • WHAT BOB FOUND

27/29

rule problems

1/12

logic bugs

29/32

findings right

✓ 0 of 40 invented a rule

✓ 0 of 40 claimed a system check

Strong on the rules. Weak on business logic, so a person still checks that.

Do the tests really guard Bob's code?

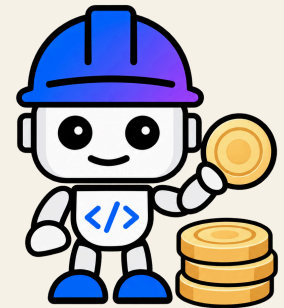

SAP BTP trial · stand-in tables · Bob's 7 tests + 1 team-added test (431 cases)

1 mode “Clean Core Architect”, written by us, no Execute

7 tasks 4 audits · 1 rewrite · 1 fix · 1 parallel run

3 agents sub-agents in parallel · 13 files in 16 minutes

4.3 / 40 Bobcoin for the whole project

07 · WHAT IT MEANS

Bob accelerates the review.
People make the decisions.
Tests check the result.
